Testimony on Bill 43 (2017)- Support

To All Concerned,

2017 MAY -9 PM 12:30

I am a resident of Country Club Village and live in Building 2 which sits parallel to the canal where it ends with a weir. Like all the other residents here and other neighboring buildings, I have lived with the stench from the canal for several years. On very bad days, the odor permeates through our parking garage and into our apartments. On many days the unpleasant smell lingers in my apartment, and I hesitate to invite guests to my home. The smell is not only unpleasant, but uncomfortable to live with.

This problem has been neglected much too long. The owners of this neglected canal must take their responsibility to clean this canal and maintain it properly. Our beautiful community deserves to be free of the smelly canal and unhealthy condition the canal has become. Thank you very much.

Sincerely,

Lynn Tagawa
Homeowner and Resident
Country Club Village, Bldg. 2
